

Nikhil Muthyala

📍 Edison, NJ ✉ nikm8218@gmail.com ☎ +1 (205) 563-0549 in [linkedin.com/in/nikhil-muthyala14](https://www.linkedin.com/in/nikhil-muthyala14)

PROFESSIONAL SUMMARY

- Data Scientist with **6 years** of experience applying **machine learning, statistics, and experimentation** to real-world business problems. Strong in **Python/SQL, EDA**, feature engineering, and building **interactive dashboards** (Power BI/Dash/QlikSense-style reporting) to drive decision-making. Experienced delivering scalable analytics solutions across cross-functional stakeholders.

CORE COMPETENCIES AND SKILLS

- **Programming:** Python, SQL, R
- **ML / Statistics:** Supervised/Unsupervised ML, Regression/Classification, Clustering, Model Eval
- **ML Libraries/Frameworks:** scikit-learn, PyTorch, TensorFlow, NumPy, Pandas
- **NLP:** NLTK, spaCy, Gensim
- **Visualization:** Power BI, Dash, QlikSense, Matplotlib, Seaborn
- **Cloud / Data:** Google Cloud Platform (GCP), BigQuery, AWS (S3, EC2, RDS), Snowflake/S
- **Big Data / ETL:** PySpark, Spark, Hive, ETL, Data Quality, Feature Engineering
- **Engineering:** Git, Docker, Linux/Unix, ML Pipelines

PROFESSIONAL EXPERIENCE

- **AI Engineer (Applied Data Science / ML)** **Feb 2024 – Present**
MaxisAI
 - Built and deployed **ML workflows** for clinical-trial data operations (extraction, validation, reconciliation), reducing manual review by **50+ hours** per solution.
 - Designed **experiments and evaluation** (error analysis, regression tests, quality metrics) to improve model/workflow robustness and reduce edge-case failures.
 - Developed **NLP/LLM-assisted information extraction** pipelines to convert unstructured clinical documents into structured outputs with guardrails (schema validation, confidence thresholds).
 - Created stakeholder-facing **dashboards / reporting views** to track workflow KPIs, exceptions, and quality trends for operational decision-making.
 - Delivered rapid client POCs that helped secure **4 enterprise clients in 6 months** and earned “**Best of the Show**” at **BIO-IT World**.
- **Data Analyst II (ML & Analytics)** **Jan 2021 – Jan 2022**
Nano Healthcare
 - Performed **EHR-driven EDA** using **Python** (pandas/NumPy, Matplotlib/Seaborn) to identify outcome drivers, contributing to a **15%** increase in treatment effectiveness.
 - Built baseline predictive models in **PyTorch** to validate signal on readmission-risk features and guide reporting/triage priorities.
 - Administered daily **SSIS** queries and database maintenance, improving control flow task efficiency by **30%**.
 - Automated analytics and reporting on demographics, readmission, and outcomes, reducing readmission by **11%** through faster interventions.
- **Associate Professional Application Delivery (Data Science / Analytics)** **Dec 2019 – Dec 2020**
DXC Technologies
 - Built an end-to-end ingestion pipeline using **Snowpipe (Snowflake)** from **AWS S3**, improving data refresh and analytics throughput by **50%**.
 - Created a **BigQuery** reporting layer with optimized table design (partitioning/clustering), speeding KPI queries and reducing compute cost for analytics.
 - Developed preprocessing + feature engineering using **PySpark** and Python (pandas/NumPy); trained models with **scikit-learn** to improve prediction accuracy by **15%**.
 - Containerized recurring batch scoring using **Docker** on **Linux** and published outputs for dashboard consumption, reducing pricing cycle time by **10%**.
- **Marketing Business Analyst** **Jun 2018 – Aug 2019**
BYJU's
 - Improved marketing performance by **25%** leveraging **Google Analytics** and CRM data for segmentation and targeting.
 - Created stakeholder dashboards and reports to communicate insights and support decision-making.

PROJECTS

- **Predictive Modeling (Customer / Outcomes)** *Python, scikit-learn, PyTorch*
- **NLP Text Mining Pipeline** *spaCy, NLTK, Gensim*
- **Interactive Analytics Dashboard (Power BI / Dash)** *KPI Monitoring, Data Visualization*

EDUCATION

- **Master's in Data Science — University of Alabama at Birmingham (UAB)** *2023*
 - Worked as a Teaching Assistant (TA) for **Cloud Computing**

CERTIFICATION

- Perform Predictive Data Analysis in BigQuery
- Implement CI/CD Pipelines on Google Cloud
- Python for Data Science, AI and Development
- Generative AI with Google Cloud (Foundation)
